

R

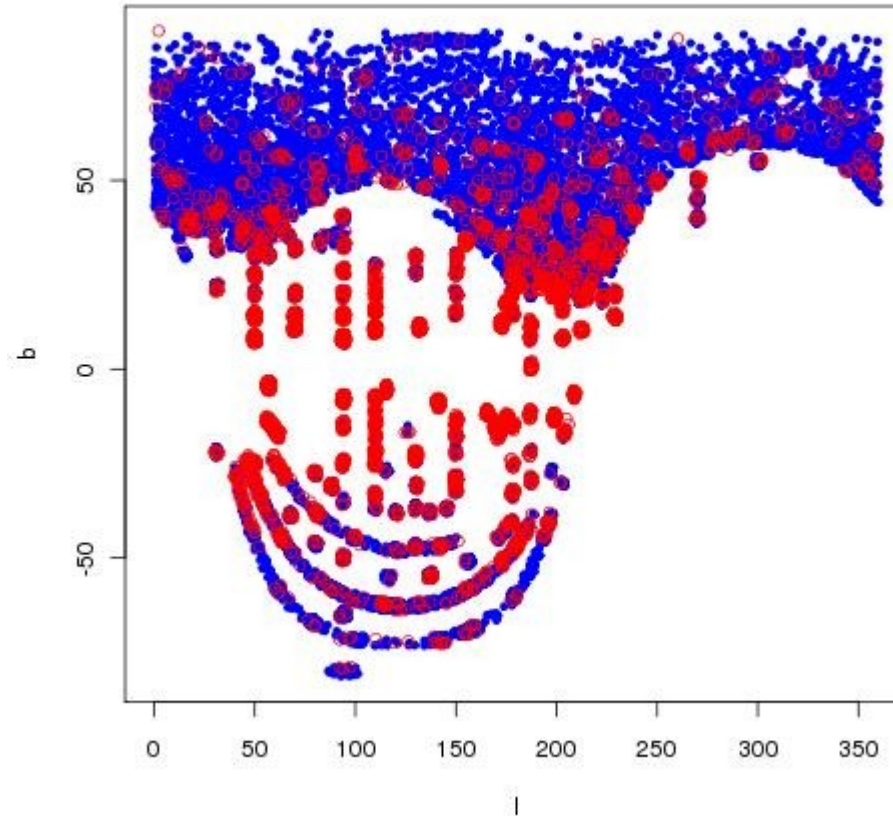

- Data structure
- Load data from file
- Graphical commands (lattice library)
- Plotting to different devices

R

```
histogram(t$b[t$feha < -2 & t$feha > -3],xlab="b",ylab="N",main="-3 < [Fe/H] < -2")
```

[Fe/H]

```
plot(t$I[t$feha < -2], t$b[t$feha < -2], pch=20, col="blue",xlab="I",ylab="b")
```

```
points(t$I[t$feha > 0], t$b[t$feha > 0], pch=21, col="red")
```

R

- MySQL – Rmysql library (requires DBI)
- Connection to MySQL server
- Load data from/to database
- Share operations between MySQL and R
